

WORK SHOP 3

Intervenção nas perturbações do cálculo

Ilse Smits, Terapeuta da Fala

Duração: 10 horas \ Workshop em Inglês

6 março: 18h30 - 21h30 | 7 março: 09h00 - 17h30

In this course we will focus on the theories, diagnostics and therapy about mathematics. Therefore, we will explore the wide range of arithmetic topics and levels. It is necessary to know how the skill develops in a normal process before and during pre-school and elementary school. We will explore the details of some models that describe the functions and processes behind the different topics. The link with language will be the focus here. Concerning dyscalculia, we will talk about different definitions and the criteria used to diagnose dyscalculia. Prevalence and comorbidity are described especially the similarity with dyslexia. After describing the main symptoms, we will talk about different phenotypes and age-linked problems.
